About

A programmer with a deep passion for programming, problem-solving, and technology. I am currently establishing a durable foundation in languages such as C, C++, and Python. I take pleasure in discovering how software can address real-world challenges. I am enthusiastic about learning, contributing to team projects, and gaining practical experience through internships or personal projects.

Education

Bachelor's degree in computer science and information technology

HELWAN NATIONAL UNIVERSITY SEPTEMBER 2024 –PRESENT

GPA: 3.26

Cairo, Egypt

Projects

Web & System Development – Leadership Institute (LDI) - Ministry of Higher Education

In Progress

Developing a web-based website for institutional presence and information delivery
Contributing to UI structure, page layout, and frontend planning
Preparing the database design and system requirements for future system implementation
Applying best practices in clean code, usability, and responsive design
